## Scope

The journal publishes articles in all fields of Tropical biology and conservation. Selection criteria are the amount of new information, quality and interest to a general readership. Studies with a strong experimental design, prolonged field work and taxonomic-systematics studies of whole groups are typical of the type of papers that are accepted, while preliminary studies and highly specialized reports are not.

## Why submit?

Manuscripts are judged solely on the criteria of quality and pertinence, and sent to three independent reviewers. The whole pre-publication process is done by Internet to reduce processing time. Authors receive digital reprints free of charge and the articles are published in Internet according to the Open Access Initiative.
